

# Using Skype on your mobile.

Skype is a brilliant way to make free calls from one PC to another. With Skype on 3, you can now make those same calls from your phone, including calls to other Skype on 3 users.

## Compatible phones

Skype is currently available on these phones:

- LG U970
- LG U990
- Sony Ericsson - K530i
- Sony Ericsson - K770i
- Sony Ericsson - K850i
- Sony Ericsson - C902
- Sony Ericsson - W9501
- Sony Ericsson - W890i
- Sony Ericsson - W910i
- Sony Ericsson - W660i
- Sony Ericsson - Z750i
- Nokia - 6120c

- Nokia - E65 NG
- Nokia - N73
- Nokia - N95
- Nokia - N95 8GB

If you get stuck on anything and need more information, visit [three.co.uk](http://three.co.uk)

## Getting started.

If you already use the desktop version of Skype on your computer, you can sign in with your existing details and see all your contacts in your address book.

**If you are new to Skype:**

You can create a Skype account from your 3 phone. Go to Planet 3 and Select Services, then Communicate, Skype or the Skype icon on your phone and follow the simple steps to download and install Skype.

**If you already have Skype on your mobile:**

Select the Skype icon and either enter in your existing Skype name, or go through the registration process on your phone or at [www.skype.com](http://www.skype.com). When you first sign in, you'll be automatically upgraded to the latest version of Skype. Please make sure you enter your email address when you create your Skype account too.

**If you already have a Skype name:**

Press 'Continue' when you get to the Skype welcome page, then click through until accepting the option 'I already have a Skype Name'. Enter your Skype name and password and sign in. Your Contacts screen will appear, which means you've successfully logged in.

**Buying Skype credit or a subscription:**

Go to [www.skype.com](http://www.skype.com) and buy credit or a calling subscription on their website.

## Key features

**Online status** - shows whether a person on Skype is available to speak or chat with you. Options include online, away, invisible and not available.

**Chat** - send and receive instant messages with your Skype contacts

**Adding and removing contacts** - automatic or manual creation and deletion

**Call options** - making, answering, ending and rejecting calls

**Privacy options** - putting calls on hold or mute

**Call Phones Abroad** - lets you make calls to mobile and landline numbers abroad at Skype's fab rates

## Differences with the PC version

Skype on 3 allows you to see your contacts status and to make Skype-to-Skype calls. The phone version doesn't yet support SkypeIn, SkypePro, video calling or calling domestic numbers with Skype credit.

**If you're signed into Skype on both the PC and your mobile**

If you receive a call while logged into Skype on both your PC and your phone, you'll receive the incoming call on both devices.

**Using Skype when you're abroad**

If you're on a Pay Monthly plan and are using a 3 sister network abroad you can use your 3 mobile to call and text home for the same price as in the UK. You will also get free access to Skype, just like at home. On Pay AS You Go, roaming services (including Skype) are available in Austria, Hong Kong, Ireland and Italy.
